SUMMARY

A software developer with over 3 years of experience specializing in back-end development using PHP Symfony, Laravel, and JavaScript Express.js. Proficient in front-end technologies like React.js and Vue.js. Demonstrated success in enhancing user engagement and expanding user bases through innovative software solutions and development projects. Known for a keen eye for detail and a relentless drive to innovate, I excel in creating robust, scalable, and efficient web applications. My ability to quickly adapt to new technologies and methodologies ensures that I consistently deliver cutting-edge solutions that meet and exceed client expectations.
